FR9SF-R with Restraint Portals

FR6STD-8O | 8 Opening Slope Top

Moduform Fortress room furniture was engineered to remove many of the risks inherent in patient bedrooms. Solid red oak was chosen as the primary material not only for strength, but to help create a less threatening and more comfortable space due its natural characteristics. Beds feature 1" thick solid red oak headboards and footboards and are bolted to a fully concealed internal steel frame that enhances its structure. There are no moving parts that can be misused. All storage is through fixed-in-place shelves making it easy for patients to display any personal items that reflect meaningful memories. All wood components are finished with our specially formulated UV cured resin that is easy to clean and maintain. This top coat will withstand heavy-use detergents as its non-reactive chemistry and other distinctive characteristics enable it to hold up to the rigors and unpredictable circumstances that arise in treatment facilities.
