Ganging Clip

SFCT01 Collegetown | SF6200ET

(2) SF6201 Chelsea | SF6200TET

Chelsea table frame components are machined into puzzle like pieces on state of the art CNC equipment to within the tightest of tolerances. During the assembly process, these components lock together while commercial adhesives and mechanical fasteners are introduced to further enhance the construction. This process results in the most durable, robust and stable foundation from which to build upholstered furniture. Fabric is upholstered to the frame with precision for a tailored fit and finish. High Pressure Laminate tops with matching edges complete the design and offer a functional surface that is attractive, easy to clean and very durable.
