

Moduform rotationally molds a rigid, high-impact polyethylene that is sealed, seamless, puncture and fluid resistant. This provides a seating solution that is easy to keep clean as mild detergents, steam and bleach-based agents can be used to aid in the prevention of blood borne pathogens. The generous seat size allows for greater comfort, while the arms make it easy to sit or stand as they add support and safety to those who are seated. Units can be joined together to create banquette style lounge areas.
