

Wrap up in comfort. The Peabody chair is perfect for providing inviting lounge spaces that encourage collaboration and social engagement. Cluster the chairs together for group learning or allow for more intimate study or conversations by reconfiguring the chairs into a smaller arrangement.

No matter how you use Peabody, rest assured it features the same high-level of quality construction you would expect from our furniture. Frame components are machined into puzzle like pieces on state-of-the-art CNC equipment to within the tightest of tolerances. During the assembly process, these components lock together while commercial adhesives and mechanical fasteners are introduced to further enhance the construction. This process results in the most durable, robust and stable foundation from which to build upholstered furniture. Sinuous wire springs are added, tied together and connected to tape lined clips which prevent squeaking. This improves the longevity and overall strength. Foam is commercial grade for comfort and resiliency. Fabric is upholstered to the frame with precision for a tailored fit and finish.

30.5" d x 30.5" w x 30.5" h
17.5" sh | 26.5" ah

Options:

- Cal 133 compliance
- Moisture barrier for seat
- (2) Fabrics

Standard Features:

- Hardwood engineered plywood frame components; puzzle cut
- Arched, sinuous wire springs
- Lined spring clips to prevent squeaking
- Commercial grade foam seat cushion with polyfiber wrap for added comfort
- Single needle | Welt cord
- Wood Cylinder leg: Standard finishes
Natural, Light Cherry, Cherry, Dark Mocha, Stone
